Cancel Submit

- After entering all the details tick both the *checkboxes* stating that the information entered is accurate.
- click on *Submit* button to proceed further.

Step-4: Pensioner Authentication

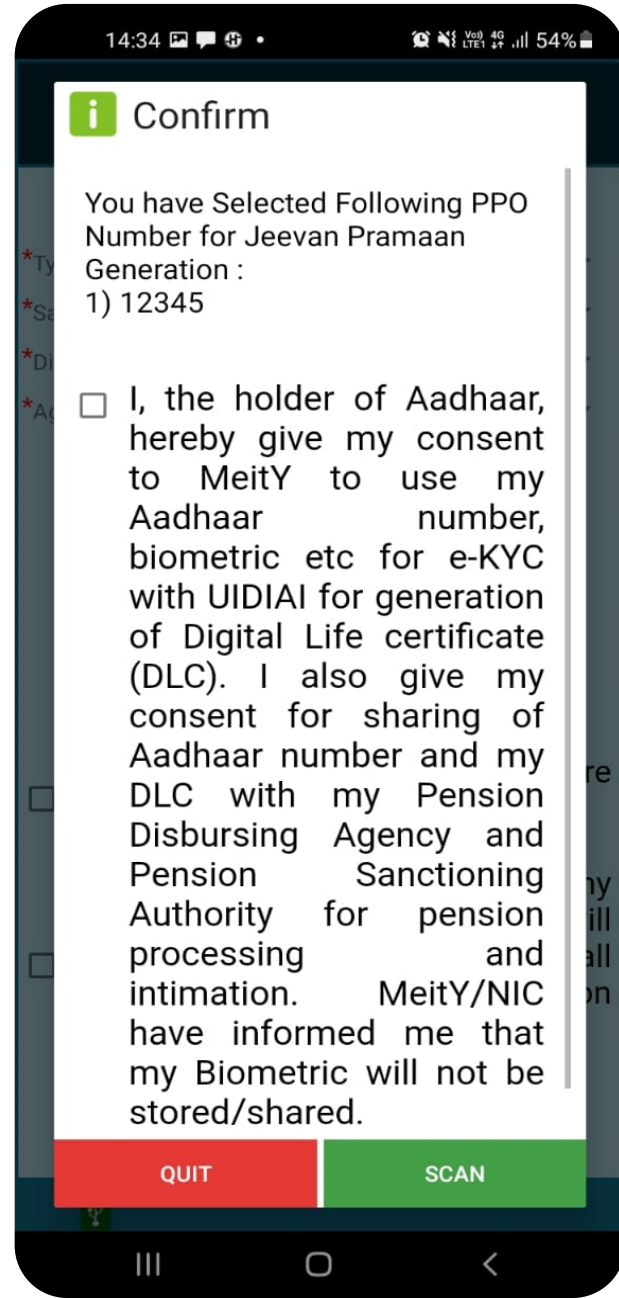

The screenshot shows the 'Jeevan Pramaan 3.6 Face App' interface. At the top, the name 'ritesh' is displayed. Below it, there are several dropdown menus for selection: 'Type of Pension' (Others), 'Sanctioning Authority' (Banking Staff), 'Disbursing Agency' (Bank), and 'Agency' (Federal Bank). A 'PPO Number' field contains the value '12345'. A white confirmation dialog box is overlaid on the screen, asking 'Do you want to Add New Pension PPO not in the list for Yourself?' with 'NO' and 'YES' options. Below the dialog, there are two checkboxes with text: 'I certify that above declarations are true and accurate.' and 'I understand and agree that any false or misleading information will justify a denial of pension and shall be liable for disciplinary action against me.' At the bottom, there are 'Cancel' and 'Submit' buttons.

- After you click on Submit button a pop-up will appear as show in figure on the left.
- The pop-up asks the pensioner whether he/she wants to add another PPO number/Pension apart from the one which has already been entered .
- In case user clicks on YES the user will be taken to the pensioner details screen (as shown on previous page) and the pensioner is required to fill all the details regarding the PPO number that he/she wants to add.

Step-4: Pensioner Authentication

- The screen shows all the PPO numbers selected by the pensioner for DLC (Digital Life Certificate)/Jeevan Pramaan generation.
- The pensioner needs to tick the *checkbox* in order to give consent.
- Click on *SCAN* button to proceed further.

Step-4: Pensioner Authentication

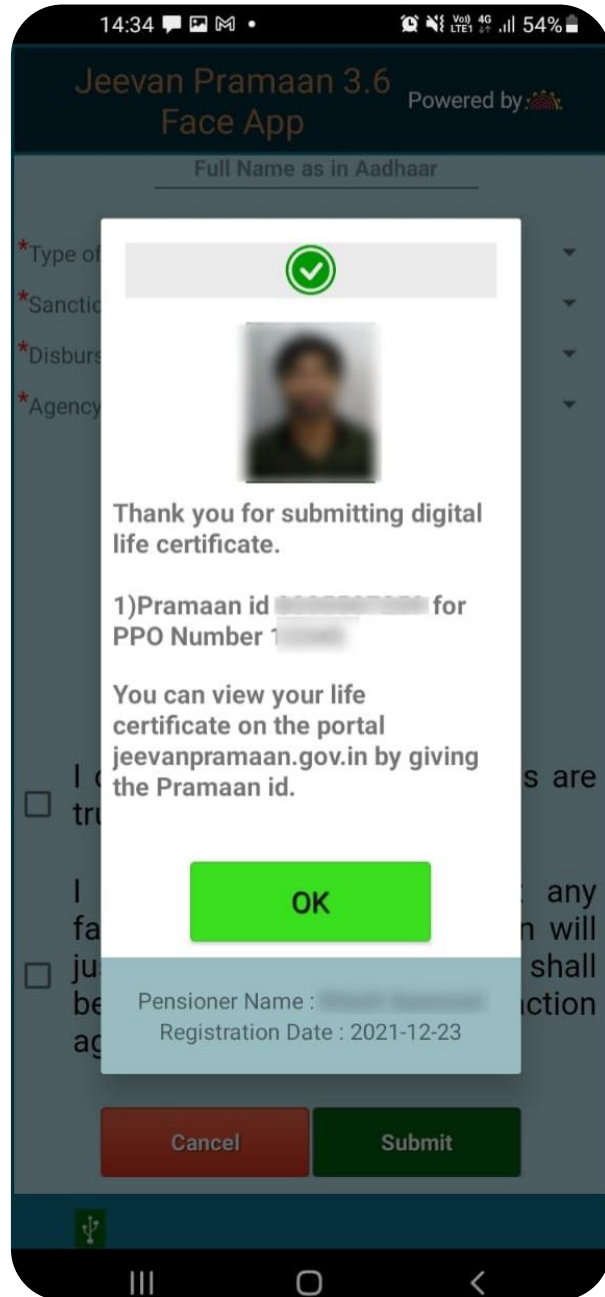

- Next, a pop-up appears asking if the pensioner wants to proceed towards Face scan
- Click on **YES** to proceed further.

Step-4: Pensioner Authentication

- The screen shows the instructions you need to follow while scanning face. It shows if the lighting is poor or if camera is moving and not stable etc.
- It will show hold still and blink your eyes when the lighting is right and the camera is stable.
- Follow the instructions shown on the screen to successfully complete the face authentication process.
- In case of any issue refer to Best Practices for Aadhaar based Face Scan on slide no: 33

Step-4: Pensioner Authentication

- Once face authentication is successful, the DLC i.e Jeevan Pramaan is successfully generated and appears on the screen as shown.
- The screen shows the Pramaan-id for each PPO number.
- The pensioner shall also receive a SMS on the mobile number provided during pensioner-authentication, the SMS contains the Pramaan-id and the link from which the DLC can be downloaded.

Best Practices for Aadhaar based Face Scan

For proper results ensure:

1. **Position:** For capturing facial image, it is advisable that adjust the camera at the right distance or in the right posture.
2. Frontal pose needs to be captured i.e. no head rotation or tilt. The Pensioner should be instructed to be seated properly with their back upright and their face towards the camera.
3. It is strongly recommended that the face should be captured with neutral (non-smiling) expression, teeth closed, and both eyes open and looking into the camera.
4. **Illumination:** Poor illumination has a high impact on the performance of face recognition. Proper and equally distributed lighting mechanism should be used such that there are no shadows over the face, no shadows in eye sockets, No light exactly above the , can cause shadows. Light should be diffused and placed in front of the Pensioner so that there are no shadows under the eye.
5. **Eye Glasses:** If the person normally wears glasses, it is recommended that the photograph be taken with glasses. However, the glasses should be clear and transparent. Dark glasses /tinted glasses should be taken off before taking the photograph.

Some of the actionable feedbacks in software are:

1. No face Found
2. Enrolee too far
3. Pose (Look Straight)
4. Insufficient lighting
5. Very low face confidence
6. Non-uniform lighting (of face in output image)
7. Incorrect background (in output image)
8. Insufficient lighting (bad grey values in face area of output image)
